THE ANNALS OF APPLIED BIOLOGY

EDITED BY

R. W. MARSH

AND

I. THOMAS

WITH THE ASSISTANCE OF

F. C. BAWDEN
M. J. R. HEALY
J. T. MARTIN
E. A. PARKIN
B. G. PETERS
D. J. WATSON

VOLUME 53

CAMBRIDGE
AT THE UNIVERSITY PRESS
1964

PUBLISHED BY
THE SYNDICS OF THE CAMBRIDGE UNIVERSITY PRESS

Bentley House, 200 Euston Road, London, N.W. 1
American Branch: 32 East 57th Street, New York 22, N.Y.

Printed in Great Britain at the University Printing House, Cambridge
(*Brooke Crutchley, University Printer*)

CONTENTS

No. 1 (February 1964)

PAGE

1. Winds of change in applied biology (Barnes Memorial Lecture). By L. Broadbent 1

2. Aqueous formulations of pyrethrum for controlling phytophagous Arthropoda—an evaluation using bioassay techniques. By W. N. Yule . . 15

3. The effect of temperature in a sack-drier on survival of insects (*Oryzaephilus surinamensis* (L.) (Col., Silvanidae)) and weed seeds (*Avena fatua* L. and *A. ludoviciana* Dur.). By Gwyneth C. Williams and Joan M. Thurston . 29

4. The toxicity of fish to mixtures of poisons. I. Salts of ammonia and zinc. By D. W. M. Herbert and D. S. Shurben 33

5. Studies on plant cuticle. VI. The isolation and fractionation of cuticular waxes. By A. M. Silva Fernandes, E. A. Baker and J. T. Martin . . 43

6. Studies on plant cuticle. VII. The nature and determination of cutin. By E. A. Baker, R. F. Batt and J. T. Martin 59

7. The effect of kinetin on infection of petunia and tomato leaves with tomato spotted-wilt virus. By I. W. Selman. (With Plate) 67

8. The effect of motley dwarf virus on yield of carrots and its transmission in the field by *Cavariella aegopodiae* Scop. By Marion Watson and E. P. Serjeant 77

9. Purification and properties of lettuce mosaic virus. By J. A. Tomlinson. (With Plate) 95

10. Investigation of carnation viruses. I. Carnation mottle. By M. Hollings and Olwen M. Stone. (With Plate) 103

11. Some factors affecting the rotting of stored apples by *Gloeosporium* spp. By K. L. Edney 119

12. Persistence and identification of downy mildew *Pseudoperonospora humuli* (Miy. and Tak.) Wilson in hop rootstocks. By J. R. Coley-Smith. (With Plate) 129

13. Studies on the application of a copper fungicide for the control of coffee leaf rust. By P. O. Park and D. A. Burdekin 133

14. Some effects of other viruses and of temperature on the multiplication of potato virus X. By R. Close 151

15. The weather and mass flights of Thysanoptera. By T. Lewis . . 165

Review 171

No. 2 (April 1964)

PAGE

Applied entomology in Britain:

1. Veterinary entomology. By W. N. Beesley 175
2. Forest entomology in Britain. By D. Bevan 180
3. Forest-products entomology in the United Kingdom. By J. D. Bletchly 184
4. Medical entomology in Britain. By J. R. Busvine 190
5. Stored-products entomology in Britain, 1964. By J. A. Freeman . 200
6. Agricultural and horticultural entomology in the United Kingdom. By F. H. Jacob 215
7. The feeding, growth and reproduction of *Aphis fabae* Scop. on *Vicia faba* under experimental conditions. By C. J. Banks and E. D. M. Macaulay. (With Plate) 229
8. The currant clearwing moth (*Aegeria tipuliformis* (Clerck)) as a pest of black currants. By A. M. Brock, C. A. Collingwood and J. H. White . 243
9. Estimation of slug populations. By A. South 251
10. Transmission of beet yellows virus by alate and apterous aphids. By G. D. Heathcote and A. J. Cockbain 259
11. On the systematic position of the coliform bacteria responsible for stalk rot of maize. By K. A. Sabet, A. S. Samra and H. A. El-Shafey . . . 267
12. Death of maiden apple trees caused by *Phytophthora syringae* Kleb. and a comparison of the pathogen with *P. cactorum* (L. & C.) Schroet. By G. W. F. Sewell and J. F. Wilson. (With Plate) 275
13. 'Lyamungu dieback' of arabica coffee in Tanganyika. I. Symptoms, distribution and experimental treatments. By D. A. Burdekin. (With Plate) 281
14. Investigations on fungicides. IX. The fungitoxicity, phytotoxicity, and systemic fungicidal activity of some inorganic salts. By G. A. Carter and R. L. Wain 291
15. The influence of date of origin of the shoot and level of nitrogen on ear size in three perennial grasses. By G. J. A. Ryle 311
16. Necrotic ring spot and prune dwarf viruses in *Prunus* and in herbaceous indicators. By R. Cropley, R. M. Gilmer and A. F. Posnette. (With Plate) 325
17. Further studies on European rasp-leaf and leaf-roll diseases of cherry trees. By R. Cropley. (With Plate) 333
18. Supplementary note on tolerance to cacao swollen-shoot virus in Nigeria. By J. F. Longworth and J. M. Thresh 343

Obituary: Ernst Gäumann (with portrait) 345

Reviews 349

No. 3 (June 1964)

PAGE

1. Master Gaster: or the nature and prospects of applied biology (Presidential Address). By A. H. Bunting. (With portrait) 351

2. Breeding for tolerance to beet yellows virus and beet mild yellowing virus in sugar beet. I. Selection and breeding methods. By G. E. Russell . . 363

3. Breeding for tolerance to beet yellows virus and beet mild yellowing virus in sugar beet. II. The response of breeding material to infection with different virus strains. By G. E. Russell 377

4. Hop line-pattern virus in relation to the etiology and distribution of nettlehead disease. By J. T. Legg. (With Plate) 389

5. The association of split-leaf blotch virus with nettlehead disease of hops. By J. T. Legg and P. J. Ormerod. (With Plate) 403

6. Slug activity in relation to weather. By D. Webley 407

7. The toxicity to fish of mixtures of poisons. II. Copper-ammonia and zinc-phenol mixtures. By D. W. M. Herbert and Jennifer M. Vandyke . 415

8. Glasshouse experiments on apple scab. I. Foliage infection in relation to wet and dry periods. By M. H. Moore. (With Plate) 423

9. Investigations on fungicides. X. The antifungal activity of 2-deoxy-D-glucose. By R. K. Atkin, D. M. Spencer and R. L. Wain 437

10. The uptake of phorate, a systemic insecticide, applied as a slurry to wheat and mustard seeds. By R. Bardner 445

11. The life-history of the Indian meal-moth, *Plodia interpunctella* (Hübner) (Lep. Phycitidae), in a warehouse in Britain and on different foods. By Gwyneth C. Williams 459

12. The effects of rates of supply of nitrogen, phosphorus, potassium and magnesium on leaf and stem growth, flowering and 'topple' of Golden Harvest and Elmus tulip. By W. F. Cheal and E. J. Hewitt. (With Plate) . . 477

13. Population increase of *Ditylenchus dipsaci* (Kühn) in the narcissus and the spread of the nematode through the soil. By J. M. Webster . . . 485

14. Proceedings of the Association of Applied Biologists 493

Symposium on freshwater fisheries research:

Introduction. By F. T. K. Pentelow 493

Population dynamics and exploitation in some freshwater fish. By E. D. Le Cren 495

The salmon and sea-trout stocks of the River Axe, Devon. By I. R. H. Allan 497

An investigation into the biology of the coarse fish of a lowland stream. By D. Cragg-Hine 498

PAGE

Tropical fishery problems and research. By ROSEMARY MCCONNELL . 502

Biophysical aspects of leaping behaviour in salmon and trout. By T. A. STUART 503

The problem of excluding fish from water intakes. By R. BAINBRIDGE 505

Sewage effluents and their effects on fisheries. By R. LLOYD . . 508

Dispersion and natural-enemy action. By J. M. FRANZ . . . 510

Reviews 517

Report of the Council of the Association of Applied Biologists for the year 1963 519
